1.LANGUAGE PREFERENCES					
TC01	Verify that the Language Preferences page loads successfully with all required elements,sections and navigation controls.	1.User has logged in. 2.User has navigated to Privacy Policy Generator.	1. Verify the page header. 2. Verify the instruction text below the header. 3. Verify available language options. 4. Verify the action buttons in the bottom-right corner. 5. Verify the left navigation panel. 6. Verify the hints card on the right-side of page. 7.Verify the policy information section in the left navigation panel 8.Verify the Preview Privacy Policy button. 9. Verify the policy progress indicator in the left navigation panel.	1. "Language Preferences" should be displayed as the page title. 2. "Select the primary language for your privacy policy" should be displayed. 3. English, Français, Deutsch, Italiano, and Español should be displayed as selectable language options. 4. Save Draft and Next buttons should be displayed and interactive. 5. Language Preferences should be displayed as the active step with other steps remain inactive. 6. The "What to know" hints card should be displayed. 7. The policy information section should display "Generating privacy policy for" followed by the website domain associated with the policy. 8.Preview Privacy Policy button should be displayed and interactive. 9. The progress indicator should display 0% Complete.	
TC02	Verify user can select only one primary language.	1. User is on Privacy Policy Generator > Language Preferences page.	1. Select English as the primary language. 2. Select Français as the primary language. 3.Continue selecting other languages and observe the action.	1. English should be selected. 2. Français should be selected and English should be deselected. 3.Only one language remains selected at any given time and multiple primary languages cannot be selected simultaneously.	
TC03	Verify that a validation message is displayed when proceeding without selecting a primary language.	1.User is on Privacy Policy Generator > Language Preferences page. 2.No primary language is selected.	1.Leave all language options unselected. 2.click next button. 3.Observe the validation message. 4.Verify the page navigation.	1.No primary language is selected. 2. Button is clicked and validation triggered. 3."Please make sure that all fields are completely filled out before we continue with the process." message should be displayed. 4.User remains on Language Preferences page.	
TC04	Verify Generate Policy in Multiple Languages section appears after selecting primary language.	1. User is on Privacy Policy Generator > Language Preferences page. 2. A primary language is selected.	1.Select a primary language. 2.Observe the section below the primary language options. 3.Verify the section description. 4.Verify available language options.	1. The selected language should be marked as selected. 2. Generate policy in multiple languages section should be displayed. 3. "Choose the languages you'd like to include" instruction should be displayed. 4. Additional language options should be displayed.	
TC05	Verify that the selected primary language is excluded from the multiple language section.	1. User is on Privacy Policy Generator > Language Preferences page. 2. A primary language is selected.	1. Select a language as the primary language. 2. Review the available additional language options. 3. Select a different language as the primary language. 4. Review the available additional language options.	1. The selected language should be displayed as the primary language. 2. The selected primary language should not be displayed in the additional language options. 3. The newly selected language should be displayed as the primary language. 4. The newly selected primary language should not be displayed in the additional language options.	
TC06	Verify that multiple language options are restricted for Free plan users.	1.User is on a free plan. 2.User is on Privacy Policy Generator > Language Preferences page.	1. Select a primary language. 2. Observe Generate policy in multiple languages section. 3. Verify displayed message in the section. 4. Attempt to select languages in the section.	1. Primary language is selected. 2. "Basic+" badge is displayed. 3. "Upgrade to Basic or above to enable multi-language support." is displayed. 4. Language selection is disabled.	
TC07	Verify that multiple languages can be selected simultaneously from the multiple language section.	1.User is on Basic,pro or ultimate plan. 2.User is on Privacy Policy Generator > Language Preferences page. 3.A primary language has been selected.	1.Select more than one language from the multiple language section. 2.Review the selected languages.	1. All selected languages should be displayed as selected. 2. Multiple languages should remain selected simultaneously.	
TC08	Verify that the "Upgrade to Basic" link redirects users to the plan upgrade popup page.	1.User is on a free plan. 2.User is on Privacy Policy Generator > Language Preferences page. 3.A primary language has been selected.	1. Locate the message "Upgrade to Basic or above to enable multi-language support." 2. Click the "Upgrade to Basic" link in the message. 3. Review the popup page. 4. Close the popup.	1. The upgrade message should be displayed. 2. The plan upgrade popup should be displayed. 3. Available subscription plans and upgrade options should be displayed. 4. The popup should close and the user should remain on the Language Preferences page.	

TC09	Verify that only the Language Preferences step is displayed active after selecting primary language.	1.User has logged in. 2.User has navigated to Privacy Policy Generator.	1. Observe the navigation panel on the left side of the page. 2. Select a primary language and verify the status of all setup steps displayed in the navigation panel. 3. Attempt to access any inactive step.	1. The setup navigation panel should be displayed. 2. Language Preferences should be highlighted as the active step after selecting the primary language and should be accessible. 3. The following setup steps should be displayed in a disabled/inactive state and should not be accessible: • Company Details • Collection of Data • Use of Data • Data Retention • Miscellaneous Disclosures • Preview & Add Policy 4. The user should not be able to navigate to any subsequent setup step until the current step is completed and saved.	
TC10	Verify Preview Privacy Policy button opens the privacy policy preview popup page.	1. User is on Privacy Policy Generator > Language Preferences page.	1. Click Preview Privacy Policy. 2. Verify the preview page. 3. Close the preview page.	1. The Privacy Policy preview should be displayed. 2. Preview content should load successfully without errors. 3. The popup should close successfully when the Close button is clicked and user should remain on the Language Preferences page.	
TC011	Verify that the Hints card is displayed with the correct information .	1.User has logged in. 2.User has navigated to Privacy Policy Generator.	1. Locate the Hints card on the right side of the page. 2. Verify the content displayed within the card.	1.The Hints card should be displayed on the right side of the page. 2.The Hints card should display the following information: Are translations available for these languages? – It should state that default translations are provided for the selected languages, users can review and customize each translation after generating the policy in the primary language, and offering the privacy policy in multiple languages helps meet legal requirements for clarity and accessibility under regulations such as GDPR and CCPA. Will updates to the default content apply to all translations? – It should state that changes made to the default content do not automatically update translated versions and users should review and adjust each translation after editing the primary policy.	
TC012	Verify that unsaved primary language changes are not retained after a browser refresh.	1. User is on Privacy Policy Generator > Language Preferences page. 2. A primary language selection has been saved previously.	1. Verify the currently saved primary language. 2. Select a different primary language without clicking Save Draft or Next. 3. Refresh the browser. 4. Review the selected primary language. 5. Verify the unsaved changes.	1. The previously saved primary language should be displayed as selected. 2. The newly selected primary language should be displayed as selected. 3. The page should reload successfully. 4. The previously saved primary language should be displayed as selected. 5. The unsaved primary language selection should not be retained after the refresh.	
TC013	Verify that clicking the Save Draft button saves the draft successfully.	1. User is on Privacy Policy Generator > Language Preferences page.	1. Verify that the Save Draft button is enabled. 2. Click the Save Draft button. 3. Verify the success notification.	1. The Save Draft button should be enabled and clickable. 2. The draft should be saved successfully. 3. A "Draft saved successfully" message should be displayed in the top-right corner of the page.	
TC014	Verify that clicking Next saves the draft and navigates to the next page.	1. User is on Privacy Policy Generator > Language Preferences page. 2. A primary language is selected.	1. Select a primary language. 2. Verify that the Next button is enabled. 3. Click the Next button. 4. Verify the success notification. 5. Verify page navigation. 6. Verify the active step in the left navigation panel.	1. The selected primary language should be displayed as selected. 2. The Next button should be enabled and clickable. 3. The language preferences should be saved successfully. 4. A "Draft saved successfully" message should be displayed in the top-right corner of the page. 5. The user should be navigated to the Company Details step. 6. Company Details should be displayed as the active step.	
2.COMPANY DETAILS					
CONTACT INFORMATION					
TC015	Verify that the Contact Information section is displayed with all required fields	1. User is on Privacy Policy Generator > Company Details page.	1. Navigate to the Company Details page. 2. Locate the Contact Information section. 3. Review all fields displayed within the section.	1. The Contact Information section should be displayed. 2. The following fields should be displayed: • Name (either company or individual) • Website URL • Email address • URL to contact (if applicable) • Full address 3. All fields should be displayed correctly without UI or formatting issues.	

TC016	Verify that valid Contact Information can be entered, saved, and retained successfully	1. User is on Privacy Policy Generator > Company Details page.	1. Enter valid values in the following fields: • Name • Website URL • Email Address • URL to Contact (if applicable) • Full Address 2. Click Save Draft. 3. Click Next.	1. The following fields should accept the entered values without displaying validation messages: • Name • Website URL • Email Address • URL to Contact (if applicable) • Full Address 2. A "Draft saved successfully!" notification should be displayed, and the entered information should be saved successfully. 3. The user should be navigated to the Business Details section.	
TC017	Verify that a page-level validation message is displayed when mandatory Contact Information fields are left blank	1. User is on Privacy Policy Generator > Company Details page.	1. Leave all mandatory Contact Information fields empty. 2. Click Next.	1. A page-level validation message "Please make sure that all fields are completely filled out before we continue with the process." should be displayed. 2. The user should remain on the Company Details page and should not be able to proceed to the next step.	
TC018	Verify that field-level validation messages are displayed for mandatory Contact Information fields	1. User is on Privacy Policy Generator > Company Details page.	1. Leave all mandatory Contact Information fields blank. 2. Click Next. 3. Review the validation messages displayed below each mandatory field. 4.	1. The mandatory Contact Information fields should remain blank. 2. The user should remain on the Company Details page and should not be navigated to the Business Details step. 3. A "This field is required." validation message should be displayed below each mandatory field left blank. 4. The validation messages should remain visible until valid values are entered into the respective fields.	
TC019	Verify that field-level validation messages are cleared after entering valid values in mandatory Contact Information fields	1. User is on Privacy Policy Generator > Company Details page. 2. "This field is required." validation messages are displayed for the mandatory Contact Information fields.	1. Enter valid values in any mandatory Contact Information fields displaying the "This field is required." validation message. 2. Review the updated fields. 3. Enter valid values in the remaining mandatory Contact Information fields. 4. Click Next.	1. The entered values should be accepted successfully. 2. The "This field is required." validation message should be cleared from the fields where valid values have been entered. 3. All mandatory fields should accept the entered values without displaying validation messages. 4. The user should be navigated to the Business Details step.	
TC020	Verify that the Name field accepts valid input within the maximum character limit.	1. User is on Privacy Policy Generator > Company Details page. 2. All other fields are filled with valid data except "Name" field.	1. Enter a valid name containing fewer than 300 characters in the Name field. 2. Review the entered value.	1. The Name field should accept the entered value without displaying a validation message. 2. The entered name should remain displayed correctly in the field.	
TC021	Verify that the Name field displays a validation message when the maximum character limit is exceeded	1. User is on Privacy Policy Generator > Company Details page. 2. All other fields are filled with valid data except "Name" field.	1. Enter more than 300 characters in the Name field. 2. Review the validation message.	1. The Name field should not accept input exceeding 300 characters. 2. The message "Please limit your response to 300 characters." should be displayed.	
TC022	Verify that the Website URL field accepts a valid URL format	1. User is on Privacy Policy Generator > Company Details page. 2. All other fields are filled with valid data except "Website URL" field.	1. Enter a valid website URL in the Website URL field. 2. Review the field.	1. The Website URL field should accept the entered URL without displaying a validation message. 2. The entered URL should remain displayed correctly in the field.	
TC023	Verify that the Website URL field rejects invalid URL formats	1. User is on Privacy Policy Generator > Company Details page. 2. All other fields are filled with valid data except "Website URL" field.	1. Enter an invalid URL in the Website URL field. 2. Move focus away from the field or click Next. 3. Review the current page.	1. The invalid URL should be entered into the field. 2. A validation message "Please enter valid URL" should be displayed and the invalid URL should not be accepted as valid input. 3. The user should remain on the Company Details page until a valid URL is entered.	
TC024	Verify that the Website URL field enforces the maximum character limit	1. User is on Privacy Policy Generator > Company Details page. 2. All other fields are filled with valid data except "Website URL" field.	1. Enter more than 500 characters in the Website URL field. 2. Review the validation message. 3. Click Next.	1. The field should not accept input exceeding 500 characters. 2. The message "Please limit your response to 500 characters." should be displayed. 3. The user should remain on the Company Details page until the value is reduced to the allowed limit.	
TC025	Verify that the Email Address field accepts a valid email address	1. User is on Privacy Policy Generator > Company Details page. 2. All other fields are filled with valid data except "Email Address" field.	1. Enter a valid email address in the Email Address field. 2. Move focus away from the field.	1. The Email Address field should accept the entered email address without displaying a validation message. 2. The entered email address should remain displayed correctly in the field.	
TC026	Verify that the Email Address field rejects invalid email address formats	1. User is on Privacy Policy Generator > Company Details page. 2. All other fields are filled with valid data except "Email Address" field.	1. Enter an invalid email address in the Email Address field. 2. Move focus away from the field or click Next. 3. Review the current page.	1. The invalid email address should be entered into the field. 2. A validation message "Please enter valid email address" should be displayed and the invalid email address should not be accepted as valid input. 3. The user should remain on the Company Details page until a valid email address is entered.	

TC027	Verify that the URL to Contact field accepts a valid URL format	1. User is on Privacy Policy Generator > Company Details page. 2.All other fields are filled with valid data except "URL to Contact" field.	1. Enter a valid URL in the URL to Contact field. 2. Move focus away from the field.	1. The URL to Contact field should accept the entered URL without displaying a validation message. 2. The entered URL should remain displayed correctly in the field.	
TC028	Verify that the URL to Contact field enforces the maximum character limit	1. User is on Privacy Policy Generator > Company Details page. 2.All other fields are filled with valid data except "URL to Contact" field.	1. Enter more than 2000 characters in the URL to Contact field. 2. Review the validation message. 3. Click Next.	1. The field should not accept input exceeding 2000 characters . 2. The message "Please limit your response to 2000 characters." should be displayed. 3. The user should remain on the Company Details page until the value is reduced to the allowed limit.	
TC029	Verify that the Full Address field accepts valid address information	1. User is on Privacy Policy Generator > Company Details page. 2.All other fields are filled with valid data except "Full Address" field.	1. Enter a complete address in the Full Address field. 2. Move focus away from the field.	1. The Full Address field should accept the entered address without displaying a validation message. 2. The entered address should remain displayed correctly in the field.	
TC030	Verify that the Full Address field enforces the maximum character limit	1. User is on Privacy Policy Generator > Company Details page. 2.All other fields are filled with valid data except "Full Address" field.	1. Enter more than 1000 characters in the Full Address field. 2. Review the validation message. 3. Click "Next".	1. The field should not accept input exceeding 1000 characters . 2. The message "Please limit your response to 1000 characters." should be displayed. 3. The user should remain on the Company Details page until the value is reduced to the allowed limit.	
TC031	Verify that "URL to Contact" field is not mandatory and does not prevent form submission when left blank	1. User is on Privacy Policy Generator > Company Details page. 2. All other fields are filled with valid data except "URL to Contact" field.	1.Leave the "URL to Contact" field empty 2.click "next".	1.No validation error should be displayed for this field. 2.User should be able to proceed to the next page successfully without entering a value in the field.	
TC032	Verify navigation from "Company Details" page to "Language Preferences" page using the "Previous" button	1. User is on Privacy Policy Generator > Company Details page.	1.Locate the "Previous" button at the bottom section of the page 2. Click the Previous button. 3. Verify the displayed page.	1.The button should be visible, enabled, and clickable. 2. The user should be navigated to the Language Preferences page. 3. The Language Preferences page should be displayed successfully with any previously entered information retained.	
TC033	Verify visibility and correctness of informational hint card on "Company Details" page	1. User is on Privacy Policy Generator > Company Details page.	1.Observe the Company Details page. 2.Review the content of the hint card .	1.Hint card should be displayed on the page. 2.The Hints card should display the title " Why company details matter " along with the following information: • Your privacy policy must clearly state who is responsible for handling personal data. • Laws such as GDPR and CCPA require accurate company or contact information so users know who to contact for privacy-related requests.	
TC034	Verify enabled, disabled, and completion states of left navigation steps on "Company Details" page	1. User is on Privacy Policy Generator > Company Details page.	1.Observe the left navigation panel. 2. Attempt to click other steps in the panel. 3.Verify completion status indicator .	1.Only "Language Preferences" and "Company Details" steps should be active/clickable. 2.Inactive steps should not respond to user interaction 3."Language Preferences" step should display a completed tick mark	
TC035	Verify visibility and correctness of progress indicator on "Company Details" page	1. User is on Privacy Policy Generator > Company Details page.	1.Observe the progress indicator located below the left navigation panel. 2.Check displayed progress value.	1.Progress indicator should be visible and clearly readable. 2. It should show "10% complete" accurately.	
TC036	Verify validation behavior when navigating from "Contact Information" to "Business Details" section within Company Details without completing mandatory fields	1. User is on Privacy Policy Generator > Company Details page.	1.Locate the section navigation under "Company Details" title (showing "Contact Information" and "Business Details") 2.Verify mandatory fields in "Contact Information" section are empty or invalid 3.Click on the "Business Details" section/tab under "Company Details" 4.Verify validation message displayed on page level. 5.Observe field-level validation message.	1.Both section tabs/links should be visible, with "Contact Information" marked as active. 2.Required fields should be unfilled and ready for input 3. The user should remain on the Company Details page and should not be navigated to the Business Details section. 4. A page-level validation message "Please make sure that all fields are completely filled out before we continue with the process." should be displayed. 5. A "This field is required." validation message should be displayed below each mandatory field left blank in the Contact Information section.	
TC037	Verify tooltip content and behavior for "URL to Contact" field .	1. User is on Privacy Policy Generator > Company Details page.	Locate the "URL to Contact (if applicable)" field in the Contact Information section. 2. Hover over the tooltip icon next to "URL to Contact" field 3.Read the tooltip content 4.Move cursor away from tooltip icon.	1.Field should be visible with label text displayed correctly 2.Tooltip should be displayed. 3.Tooltip should display: "The 'URL to contact' refers to the link users can use to reach support in case of issues or questions regarding the privacy policy. This is not a mandatory field." 4.Tooltip should disappear.	
BUSINESS DETAILS					

TC038	Verify Business Details page displays all three primary questions with Yes/No options on initial load	1. User is on Privacy Policy Generator > Company Details page > Business Details	1. Navigate to the Business Details page (e.g., clicking "Next" from Company Details or selecting the step from navigation if enabled) 2. Observe the main questionnaire section on the page. 3. Verify each question layout. 4. Check default state of all questions.	1. User should be redirected to the Business Details page successfully without errors 2. Exactly three primary questions should be displayed under Business Details .Do you have users in EU/EEA? .Do you have users in California? . Do you sell or share the personal information of users? 3. Each question should include a tooltip, Yes/No button options clearly visible and properly aligned. 4. All Yes/No options should be unselected by default (unless previously saved data exists).	
TC039	Verify selecting "Yes" option for the "Do you have users in EU/EEA?" question	1. User is on the Privacy Policy Generator > Company Details > Business Details section. 2. The "Do you have users in EU/EEA?" question is displayed.	1. Locate the "Do you have users in EU/EEA?" question on the Business Details page. 2. Click the "Yes" option. 3. Verify the state of both options.	1. The question should be displayed with Yes and No button options. 2. The Yes option should become selected and visually highlighted to indicate it is the active selection. 3. The Yes option should remain selected, and the No option should remain unselected.	
TC040	Verify selecting "No" option for the "Do you have users in EU/EEA?" question	1. User is on the Privacy Policy Generator > Company Details > Business Details section. 2. The "Do you have users in EU/EEA?" question is displayed.	1. Locate the "Do you have users in EU/EEA?" question. 2. Click the "No" option. 3. Verify the state of both options.	1. The question should display Yes and No options. 2. The No option should become selected and visually highlighted. 3. The No option should remain selected and the Yes option should remain unselected.	
TC041	Verify confirmation dialog when switching from "Yes" to "No" for the "Do you have users in EU/EEA?" question.	1. User is on the Privacy Policy Generator > Company Details > Business Details section. 2. The "Yes" option for "Do you have users in EU/EEA?" question is currently selected.	1. Verify that the Yes option is currently selected. 2. Click the No option. 3. Observe the confirmation dialog. 4. Review the popup content. 5. Verify the available actions.	1. The Yes option should be highlighted as the active selection. 2. The system should not immediately change the selection. 3. A confirmation popup should be displayed with the title "Remove GDPR clauses from your policy?" 4. The popup should display the message: "If you remove this clause, all GDPR-related sections will be excluded from your policy. Your policy may no longer meet EU/EEA data protection requirements." 5. The popup should display a "Keep clause" button and a "Remove" button, with the "Remove" button styled in red to indicate a destructive action.	
TC042	Verify clicking "Keep clause" closes the confirmation popup and retains the EU/EEA selection	1. User is on the Privacy Policy Generator > Company Details > Business Details section 2. Yes is selected for the EU/EEA question. 3. The Remove GDPR clauses from your policy? confirmation popup is displayed.	1. Click the Keep clause button. 2. Observe the EU/EEA question. 3. Verify the selection state.	1. The confirmation popup should close. 2. The Yes option should remain selected and highlighted. 3. No changes should be made to the GDPR clause in policy configuration.	
TC043	Verify clicking "Remove" confirms removal of GDPR clauses and changes the selection to "No"	1. User is on the Privacy Policy Generator > Company Details > Business Details section 2. Yes is selected for the EU/EEA question. 3. The Remove GDPR clauses from your policy? confirmation popup is displayed.	1. Click the Remove button. 2. Observe the EU/EEA question. 3. Verify the selection state.	1. The confirmation popup should close. 2. The No option should become selected and highlighted. 3. The Yes option should become unselected, and the GDPR clause should be removed from the policy configuration.	
TC044	Verify the informational tooltip for the "Do you have users in EU/EEA?" question displays the correct guidance	1. User is on the Privacy Policy Generator > Company Details > Business Details section. 2. The "Do you have users in EU/EEA?" question is displayed.	1. Locate the information (i) icon next to the "Do you have users in EU/EEA?" question. 2. Hover over information icon. 3. Review the tooltip content. 4. Verify the reference link in the tooltip. 5. Click outside the tooltip or move the pointer away.	1. The information icon should be visible and enabled. 2. A tooltip should be displayed. 3. The tooltip should display the text: "Applies to any business that collects and processes the information of EU/EEA residents." 4. The tooltip should include a clickable link to the List of EU/EEA countries (https://www.gov.uk/eu-eea). 5. The tooltip should close without affecting the selected value of the EU/EEA question.	
TC045	Verify selecting "Yes" for the "Do you have users in California?" question displays the "For-profit organisation" question	1. User is on the Privacy Policy Generator > Company Details > Business Details section. 2. The "Do you have users in California?" question is visible.	1. Locate the "Do you have users in California?" question. 2. Click the Yes option. 3. Observe the page below the California question. 4. Verify the available options for the new question.	1. The question should be displayed with Yes and No options. 2. The Yes option should become selected and visually highlighted. 3. The question "Are you a 'for-profit' organisation?" should be displayed. 4. The For-profit organisation question should display Yes and No options.	

TC046	Verify selecting "No" for the "Do you have users in California?" question	1. User is on the Privacy Policy Generator > Company Details > Business Details section. 2. No option is currently selected for the California question.	1. Locate the "Do you have users in California?" question. 2. Click the No option. 3. Verify the page content.	1. The question should display Yes and No options. 2. The No option should become selected and visually highlighted. 3. The "Are you a 'for-profit' organisation?" question should not be displayed.	
TC047	Verify confirmation popup is displayed when changing the California selection from "Yes" to "No"	1. User is on the Privacy Policy Generator > Company Details > Business Details section. 2. Yes is currently selected for the "Do you have users in California?" question. 3. The "Are you a 'for-profit' organisation?" question is displayed.	1. Verify that Yes is selected for the California question. 2. Click the No option. 3. Observe the confirmation popup. 4. Review the popup message. 5. Verify the available actions. 6. Observe the page behind the popup.	1. The Yes option should be highlighted and the For-profit organisation question should be visible. 2. The system should display a confirmation popup before changing the selection. 3. A popup should be displayed with the title "Remove CCPA clauses from your policy?" 4. The popup should display the message: "If you remove this clause, all CCPA-related sections will be excluded from your policy. Your policy may no longer meet California's data privacy requirements." 5. The popup should display Keep clause and Remove buttons. The Remove button should be displayed in red to indicate a destructive action. 6. The "Are you a 'for-profit' organisation?" question should no longer be displayed until the action is confirmed.	
TC048	Verify clicking "Keep clause" retains the California selection and restores the dependent question	1. User is on the Privacy Policy Generator > Company Details > Business Details section. 2. The Remove CCPA clauses from your policy? confirmation popup is displayed.	1. Click the Keep clause button. 2. Observe the California question. 3. Verify the dependent question.	1. The confirmation popup should close. 2. The Yes option should remain selected and highlighted. 3. The "Are you a 'for-profit' organisation?" question should remain visible with its Yes and No options.	
TC049	Verify clicking "Remove" changes the California selection to "No"	1. User is on the Privacy Policy Generator > Company Details > Business Details section. 2. The Remove CCPA clauses from your policy? confirmation popup is displayed.	1. Click the Remove button. 2. Observe the California question. 3. Verify the dependent question. 4. Verify the page state.	1. The confirmation popup should close. 2. The No option should become selected and highlighted. 3. The "Are you a 'for-profit' organisation?" question should no longer be displayed. 4. All CCPA-dependent questions should be removed from the page.	
TC050	Verify the informational tooltip for the "Do you have users in California?" question displays the correct guidance	1. User is on the Privacy Policy Generator > Company Details > Business Details section.	1. Locate the information (i) icon next to the "Do you have users in California?" question. 2. Hover over the information (i) icon. 3. Review the tooltip content. 4. Click outside the tooltip or move the cursor away from the information icon.	1. The information icon should be visible and enabled. 2. An informational tooltip should be displayed adjacent to the icon. 3. The tooltip should display the following text: "The CCPA does not mention anything about accidental or one-time visitors. However, if your service does not target users from California, you may choose not to answer 'Yes' to this question, although it is recommended to do so." 4. The tooltip should close without affecting the current selection for the California question.	
TC051	Verify selecting "Yes" for the "Are you a 'for-profit' organisation?" question displays the CCPA thresholds question	1. User has Pro or ultimate subscription. 2. User is on Privacy Policy Generator > Company Details > Business Details. 3. "Do you have users in California?" is selected as "Yes".	1. Locate the "Are you a 'for-profit' organisation?" question. 2. Click the "Yes" option. 3. Observe the section below the question. 4. Review the threshold criteria displayed.	1. The question should be visible with "Yes" and "No" options. 2. The "Yes" option should become selected and highlighted. 3. The "Do you cross one or more of the following thresholds?" section should be displayed. 4. The following criteria should be visible: - \$25 million or more gross revenue in the previous calendar year. - Process information for 100,000 or more customers. - Earns 50% or more revenue from the sale of customers' personal information (including information shared for cross-context behavioural advertising). The section should also display "Yes" and "No" options.	
TC052	Verify selecting "No" for the "Are you a 'for-profit' organisation?" question	1. User has Pro or ultimate subscription. 2. User is on Privacy Policy Generator > Company Details > Business Details. 3. "Do you have users in California?" is selected as "Yes".	1. Click the "No" option for "Are you a 'for-profit' organisation?" 2. Observe the page content.	1. The "No" option should become selected and highlighted. 2. The CCPA thresholds question should not be displayed.	
TC053	Verify changing the "For-Profit Organisation" selection from "No" to "Yes" displays the thresholds question	1. User has Pro or ultimate subscription. 2. User is on Privacy Policy Generator > Company Details > Business Details. 3. "Do you have users in California?" is selected as "Yes".	1. Verify "No" is currently selected. 2. Click the "Yes" option. 3. Observe the page below the question.	1. The "No" option should be highlighted as the active selection. 2. The "Yes" option should become selected and highlighted. 3. The "Do you cross one or more of the following thresholds?" section should appear with its Yes/No options.	

TC054	Verify selecting "Yes" for the CCPA thresholds question displays the "Disclosure of data" step in the left navigation	1.User has Pro or ultimate subscription. 2.User is on Privacy Policy Generator > Company Details > Business Details. 3."Do you have users in California?" is selected as "Yes". 4."For-Profit Organisation" is selected as "Yes".	1. Locate the "Do you cross one or more of the following thresholds?" question. 2. Click the "Yes" option. 3. Observe the left navigation panel. 4. Verify the state of the new step.	1. The question should be visible with "Yes" and "No" options. 2. The "Yes" option should become selected and highlighted. 3. A new "Disclosure of data" step should appear above the "Data retention" step. 4. The "Disclosure of data" step should be visible but disabled until the user progresses further in the workflow.	
TC055	Verify selecting "No" for the CCPA thresholds question displays the CCPA-compliant clauses question.	1.User has Pro or ultimate subscription. 2.User is on Privacy Policy Generator > Company Details > Business Details. 3."Do you have users in California?" is selected as "Yes". 4."For-Profit Organisation" is selected as "Yes".	1.Click the "No" option for the thresholds question. 2.Observe the section below the thresholds question.	1.The "No" option should become selected and highlighted. 2.The question "Do you want to include CCPA-compliant clauses even if not legally required?" should be displayed with "Yes" and "No" options.	
TC056	Verify changing the thresholds selection from "Yes" to "No" removes the "Disclosure of data" step and displays the CCPA-compliant clauses question.	1.User has Pro or ultimate subscription. 2.User is on Privacy Policy Generator > Company Details > Business Details. 3."Do you have users in California?" is selected as "Yes". 4."For-Profit Organisation" is selected as "Yes". 5."Yes" selected for threshold question. 6.The "Disclosure of data" step is visible in the left navigation bar.	1. Verify the "Disclosure of data" step is currently visible in the left navigation. 2. Click the "No" option for the thresholds question. 3. Observe the left navigation panel. 4. Observe the section below the thresholds question.	1. The step should be displayed above "Data retention". 2. The "No" option should become selected and highlighted. 3. The "Disclosure of data" step should disappear from the navigation panel. 4. The question "Do you want to include CCPA-compliant clauses even if not legally required?" should appear with "Yes" and "No" options.	
TC057	Verify selecting "Yes" for the CCPA-compliant clauses question displays the "Disclosure of data" step.	1.User has Pro or ultimate subscription. 2.User is on Privacy Policy Generator > Company Details > Business Details. 3."Do you have users in California?" is selected as "Yes". 4."For-Profit Organisation" is selected as "Yes". 5."No" selected for threshold question.	1. Locate the question "Do you want to include CCPA-compliant clauses even if not legally required?" 2. Click the "Yes" option. 3. Observe the left navigation panel.	1. The question should display "Yes" and "No" options. 2. The "Yes" option should become selected and highlighted. 3. The "Disclosure of data" step should appear in the left navigation above "Data retention".	
TC058	Verify selecting "No" for the CCPA-compliant clauses question does not add the "Disclosure of data" step.	1.User has Pro or ultimate subscription. 2.User is on Privacy Policy Generator > Company Details > Business Details. 3."Do you have users in California?" is selected as "Yes". 4."For-Profit Organisation" is selected as "Yes". 5."No" selected for threshold question. 6.No option is currently selected for the question.	1.Click the "No" option for "Do you want to include CCPA-compliant clauses even if not legally required?" 2.Observe the left navigation panel.	1.The "No" option should become selected and highlighted. 2.The "Disclosure of data" step should not be displayed in the left navigation panel.	
TC059	Verify changing the CCPA-compliant clauses selection from "Yes" to "No" removes the "Disclosure of data" step.	1.User has Pro or ultimate subscription. 2.User is on Privacy Policy Generator > Company Details > Business Details. 3."Do you have users in California?" is selected as "Yes". 4."For-Profit Organisation" is selected as "Yes". 5."No" selected for the threshold question. 6."Yes" is currently selected for the question. 7.The "Disclosure of data" step is visible in the left navigation panel.	1. Verify that "Yes" is currently selected for the optional CCPA clauses question. 2. Click the "No" option. 3. Observe the left navigation panel. 4. Verify the workflow state.	1. The "Yes" option should be selected and the "Disclosure of data" step should be visible in the left navigation panel. 2. The "No" option should become selected and highlighted. 3. The "Disclosure of data" step should be removed from the left navigation panel immediately. 4. The workflow should continue without the "Disclosure of data" step.	

TC060	Verify the "Are you a 'for-profit' organisation?" question is displayed in a locked state for Free and basic users.	1. User has a Free or basic subscription. 2. User is on Privacy Policy Generator > Company Details > Business Details. 3. "Do you have users in California?" is selected as "Yes".	1. Locate the "Are you a 'for-profit' organisation?" question. 2. Observe the section below the question. 3. Verify the Yes and No options. 4. Attempt to click the Yes option. 5. Attempt to click the No option.	1. The "Are you a 'for-profit' organisation?" question should be displayed with a Pro+ badge. 2. The informational message "Upgrade to Pro or higher to add this and the subsequent clauses. CCPA applies only to eligible for-profit businesses (see criteria on the right →)." should be displayed below the question. 3. The Yes and No options should appear disabled, inactive and display a lock icon. 4. Clicking the Yes option should not change the selection. 5. Clicking the No option should not change the selection.	
TC061	Verify clicking the "Upgrade to Pro" link opens the subscription upgrade popup.	1. User has a Free or basic subscription. 2. User is on Privacy Policy Generator > Company Details > Business Details. 3. "Do you have users in California?" is selected as "Yes". 4. The "Are you a 'for-profit' organisation?" question is displayed in a locked state.	1. Locate the "Upgrade to Pro" hyperlink in the informational message. 2. Click the "Upgrade to Pro" link. 3. Observe the popup displayed on the screen. 4. Review the available actions in the popup.	1. The hyperlink should be visible and clickable. 2. A subscription upgrade popup should be displayed. 3. The popup should display the available Pro plan details. 4. The popup should contain the following actions: "Get started with Pro plan", "Continue with limited policy", and a Close (X) icon.	
TC062	Verify selecting "Continue with limited policy" closes the subscription upgrade popup.	1. User has a Free or basic subscription. 2. User is on Privacy Policy Generator > Company Details > Business Details. 3. "Do you have users in California?" is selected as "Yes". 4. The "Are you a 'for-profit' organisation?" question is displayed in a locked state. 5. "Upgrade to Pro" link is clicked. 6. The subscription upgrade popup is displayed.	1. Click the "Continue with limited policy" button. 2. Observe the popup. 3. Observe the Business Details page. 4. Verify the "Are you a 'for-profit' organisation?" section.	1. The popup should close successfully. 2. The user should remain on the Business Details page. 3. No changes should be made to the previously entered data. 4. The "Are you a 'for-profit' organisation?" question should remain locked with the Pro+ badge, informational message, and disabled Yes/No options.	
TC063	Verify clicking the Close (X) icon dismisses the subscription upgrade popup.	1. User has a Free or basic subscription. 2. User is on Privacy Policy Generator > Company Details > Business Details. 3. "Do you have users in California?" is selected as "Yes". 4. The "Are you a 'for-profit' organisation?" question is displayed in a locked state. 5. "Upgrade to Pro" link is clicked. 6. The subscription upgrade popup is displayed.	1. Locate the Close (X) icon in the popup. 2. Click the Close (X) icon. 3. Observe the popup. 4. Observe the Business Details page. 5. Verify the "Are you a 'for-profit' organisation?" section.	1. The Close (X) icon should be visible and clickable. 2. The popup should close immediately. 3. The user should remain on the Business Details page. 4. The "Are you a 'for-profit' organisation?" question should continue to be displayed in a locked state with the Pro+ badge, informational message, and disabled Yes/No options. 5. No data on the page should be modified after closing the popup.	
TC064	Verify clicking "Get started with Pro plan" redirects the user to the payment checkout page	1. User has a Free or basic subscription. 2. User is on Privacy Policy Generator > Company Details > Business Details. 3. "Do you have users in California?" is selected as "Yes". 4. The "Are you a 'for-profit' organisation?" question is displayed in a locked state. 5. "Upgrade to Pro" link is clicked. 6. The subscription upgrade popup is displayed.	1. Verify that the subscription upgrade popup is displayed. 2. Locate the "Get started with Pro plan" button. 3. Click the "Get started with Pro plan" button. 4. Observe the page navigation.	1. The "Get started with Pro plan" button should be visible and enabled. 2. Clicking the button should redirect the user to the payment/checkout page. 3. The checkout page should display the Pro plan details, pricing information, and payment options. 4. The user should be able to proceed with the Pro plan purchase from the checkout page.	
TC065	Verify the informational tooltip for the "Are you a 'for-profit' organisation?" question displays the correct guidance	1. User is on Privacy Policy Generator > Company Details > Business Details. 2. "Do you have users in California?" is selected as "Yes". 3. The "Are you a 'for-profit' organisation?" question is visible.	1. Locate the information (i) icon next to the "Are you a 'for-profit' organisation?" question. 2. Hover over the information (i) icon. 3. Verify the heading and content displayed in the tooltip. 4. Click outside the tooltip or move the cursor away from the information icon.	1. The information (i) icon should be visible and enabled beside the "Are you a 'for-profit' organisation?" question. 2. An informational tooltip should be displayed adjacent to the icon. 3. The tooltip should display the following guidance: "Under the CCPA/CPRA, only for-profit businesses that collect, share, or sell personal information of California residents are required to comply. Nonprofits and government entities are generally exempt." 4. The tooltip should close without affecting the current selection or any other page elements.	

TC066	Verify the informational hint card displays the correct guidance on the Business Details page.	1. User is on Privacy Policy Generator > Company Details > Business Details.	1. Navigate to the Business Details page. 2. Locate the informational hint card on the right side of the page. 3. Verify the heading "Why business details matter". 4. Review the content under the "Why business details matter" heading. 5. Verify the heading "About CCPA clauses". 6. Review the content under the "About CCPA clauses" heading.	1. The Business Details page should load successfully. 2. An informational hint card should be visible on the page. 3. The heading " Why business details matter " should be displayed. 4. The following information should be displayed under the heading: "The regions where your users are located determine which privacy laws apply to your business. If you have users in the EU/EEA, GDPR obligations will be included in your policy. If you serve users in California, CCPA provisions will apply. Answering these questions ensures your policy reflects the right legal requirements." 5. The heading " About CCPA clauses " should be displayed. 6. The following information should be displayed under the heading: "Certain CCPA-related obligations (such as thresholds for revenue or data processing) only apply to businesses that meet specific legal criteria. These sections may be locked unless your plan supports them. If you're unsure whether they apply, consult your legal advisor to avoid compliance gaps."	
TC067	Verify selecting "Yes" for the "Do you sell or share the personal information of users?" question displays the dependent questions with input fields.	1. User is on Privacy Policy Generator > Company Details > Business Details. 2. The "Do you sell or share the personal information of users?" question is visible.	1. Locate the "Do you sell or share the personal information of users?" question. 2. Click the "Yes" option. 3. Verify the question "What categories of personal information do you sell or share?" is displayed. 4. Verify the question "What categories of third parties do you disclose personal information to?" is displayed. 5. Observe the left navigation panel.	1. The question should display Yes and No options. 2. The "Yes" option should become selected and highlighted. 3. The question "Provide the categories of personal information that are sold or shared." should be displayed with an editable text input field. 4. The question "For each category of personal information that is sold or shared, the categories of third parties to which such information is sold or shared." should be displayed with an editable text input field. 5. The "Disclosure of data" step should appear in the left navigation panel.	
TC068	Verify selecting "No" for the "Do you sell or share the personal information of users?" question	1. User is on Privacy Policy Generator > Company Details > Business Details. 2. The question is visible.	1. Click the "No" option. 2. Observe the page content.	1. The "No" option should become selected and highlighted. 2. The additional questions and text input fields should not be displayed.	
TC069	Verify changing the selection from "Yes" to "No" removes the additional input fields and the "Disclosure of data" step	1. User is on Privacy Policy Generator > Company Details > Business Details. 2. "Yes" is currently selected for "Do you sell or share the personal information of users?". 3. The additional input fields and "Disclosure of data" step are displayed.	1. Verify that "Yes" is currently selected. 2. Click the "No" option. 3. Observe the section below the question. 4. Observe the left navigation panel.	1. The "Yes" option should be selected and the additional input fields should be visible. 2. The "No" option should become selected and highlighted. 3. Both additional input fields should be removed from the page. 4. The "Disclosure of data" step should disappear from the left navigation panel.	
TC070	Verify changing the selection from "No" to "Yes" displays the additional input fields and the "Disclosure of data" step	1. User is on Privacy Policy Generator > Company Details > Business Details. 2. "No" is currently selected for "Do you sell or share the personal information of users?".	1. Verify that "No" is currently selected. 2. Click the "Yes" option. 3. Observe the section below the question. 4. Observe the left navigation panel.	1. The "No" option should be selected. 2. The "Yes" option should become selected and highlighted. 3. The two additional input fields should be displayed. 4. The "Disclosure of data" step should appear in the left navigation panel.	
TC071	Verify the informational tooltip for the "Do you sell or share the personal information of users?" question displays the correct guidance	1. User is on Privacy Policy Generator > Company Details > Business Details. 2. The "Do you sell or share the personal information of users?" question is visible.	1. Locate the information (i) icon next to the question. 2. Hover over the information (i) icon. 3. Review the tooltip content. 4. Click outside the tooltip or move the cursor away from the information icon.	1. The information (i) icon should be visible and enabled. 2. An informational tooltip should be displayed adjacent to the icon. 3. The tooltip should display the following guidance: "Selling' or 'sharing' personal information under the CCPA/CPRA includes disclosing it to third parties for monetary or other valuable consideration, such as targeted advertising. If you use analytics or ad tools that track users, this may count as sharing." 4. The tooltip should close without affecting the selected option or any other page elements.	
TC072	Verify the "Provide the categories of personal information that are sold or shared." field accepts valid input	1. User is on Privacy Policy Generator > Company Details > Business Details. 2. "Do you sell or share the personal information of users?" is selected as "Yes".	1. Locate the "Provide the categories of personal information that are sold or shared." text field. 2. Enter valid categories (e.g., contact details, browsing data). 3. Click outside the field.	1. The text field should be displayed and enabled for input. 2. The entered information should be accepted without displaying any validation message. 3. The entered value should remain displayed correctly in the text field.	
TC073	Verify the "Provide the categories of personal information that are sold or shared." field enforces the maximum character limit	1. User is on Privacy Policy Generator > Company Details > Business Details. 2. "Do you sell or share the personal information of users?" is selected as "Yes".	1. Enter more than 2000 characters in the "Provide the categories of personal information that are sold or shared." text field. 2. Click Next. 3. Observe the validation messages displayed. 4. Verify the page state.	1. The field should accept input up to the maximum supported character limit of 2000 characters and prevent additional characters from being entered. 2. The user should remain on the Business Details page. 3. The page-level validation message "Please make sure that all fields are completely filled out before we continue with the process." should be displayed. The field-level validation message "Please limit your response to 2000 characters." should be displayed. 4. The user should not be able to proceed to the next page until the field value is reduced to 2000 characters or fewer and all required validations are satisfied.	

TC074	Verify the "For each category of personal information that is sold or shared, the categories of third parties to which such information is sold or shared." field accepts valid input.	1. User is on Privacy Policy Generator > Company Details > Business Details. 2. "Do you sell or share the personal information of users?" is selected as "Yes".	1. Locate the "For each category of personal information that is sold or shared, the categories of third parties to which such information is sold or shared." text field. 2. Enter valid third-party categories (e.g., Advertising Partners, marketing partners, Analytics tools). 3. Click outside the field.	1. The text field should be displayed and enabled for input. 2. The entered information should be accepted without displaying any validation message. 3. The entered value should remain displayed correctly in the text field.	
TC075	Verify the "For each category of personal information that is sold or shared, the categories of third parties to which such information is sold or shared." field enforces the maximum character limit.	1. User is on Privacy Policy Generator > Company Details > Business Details. 2. "Do you sell or share the personal information of users?" is selected as "Yes".	1. Enter more than 2000 characters in the "For each category of personal information that is sold or shared, the categories of third parties to which such information is sold or shared." text field. 2. Click Next. 3. Observe the validation messages displayed. 4. Verify the page state.	1. The field should accept input up to the maximum supported character limit of 2000 characters and prevent additional characters from being entered. 2. The user should remain on the Business Details page. 3. The page-level validation message "Please make sure that all fields are completely filled out before we continue with the process." should be displayed. The field-level validation message "Please limit your response to 2000 characters" should be displayed. 4. The user should not be able to proceed to the next page until the field value is reduced to 2000 characters or fewer and all required validations are satisfied.	
TC076	Verify clicking the "Previous" button on the Business Details page navigates to the Contact Information section.	1. User is on Privacy Policy Generator > Company Details > Business Details. 2. The Business Details section is currently displayed.	1. Verify that the Business Details section is displayed. 2. Locate the Previous button at the bottom-left of the page. 3. Click the Previous button. 4. Observe the page content.	1. The Business Details section should be displayed. 2. The Previous button should be visible and enabled. 3. The application should navigate to the Contact Information section under Company Details. 4. The Contact Information section should become the active section, and all previously entered information should remain intact.	
TC077	Verify the "Disclosure of data" step is displayed only when at least one qualifying CCPA/CalOPPA condition is selected as "Yes"	1. User has a Pro or ultimate subscription. 2. User is on Privacy Policy Generator > Company Details > Business Details. 3. The questions "Do you cross one or more of the following thresholds?", "Do you want to include CCPA-compliant clauses even if not legally required?" (if applicable), and "Do you sell or share the personal information of users?" are available according to the workflow.	1. Select "Yes" for "Do you cross one or more of the following thresholds?" and observe the left navigation panel. 2. Change the thresholds selection to "No" and select "Yes" for "Do you want to include CCPA-compliant clauses even if not legally required?". 3. Change the CCPA-compliant clauses selection to "No" and select "Yes" for "Do you sell or share the personal information of users?". 4. Finally, set all three qualifying conditions to "No".	1. The "Disclosure of data" step should be displayed in the left navigation panel when the thresholds question is selected as "Yes". 2. The "Disclosure of data" step should remain displayed when the thresholds question is "No" but the CCPA-compliant clauses question is selected as "Yes". 3. The "Disclosure of data" step should remain displayed when both previous conditions are "No" but the "Do you sell or share the personal information of users?" question is selected as "Yes". 4. The "Disclosure of data" step should be removed from the left navigation panel only when all qualifying conditions are selected as "No".	
3.COLLECTION OF DATA					
PERSONAL INFORMATION					
TC078	Verify the "Collection of data" page is displayed with the "Personal Information" subsection active.	1. User has completed the Company Details section. 2. User is navigated to Privacy Policy Generator > Collection of Data.	1. Navigate to the Collection of Data page. 2. Observe the page title. 3. Observe the subsections displayed below the page title. 4. Verify the active subsection. 5. Observe the page content. 6. Observe the page navigation controls.	1. The Collection of Data page should load successfully without any errors. 2. The page title should be displayed as "Collection of data". 3. The following subsections should be displayed below the page title: • 1. Personal information • 2. Additional information 4. The "Personal information" subsection should be active, and the "Additional information" subsection should be inactive. 5. The Personal Information section should display all applicable questions, checklists, and input fields based on the selections made in the Company Details section. 6. The Previous, Save Draft and Next buttons should be visible and enabled.	
TC081	Verify clicking the "Previous" button on the Personal Information page navigates to the Business Details section.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The Personal Information subsection is currently displayed.	1. Verify that the Personal Information subsection is displayed. 2. Locate the Previous button at the bottom-left of the page. 3. Click the Previous button. 4. Observe the displayed page.	1. The Personal Information subsection should be displayed. 2. The Previous button should be visible and enabled. 3. The application should navigate to the Company Details > Business Details section. 4. The Business Details section should become active, and all previously entered information should remain intact.	

TC082	Verify clicking the "Next" button on the Personal Information page navigates to the "Additional Information" subsection when all mandatory information is completed.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. All mandatory selections and required fields have been completed with valid values.	1. Verify that all mandatory selections and required fields are completed. 2. Locate the Next button at the bottom-right of the page. 3. Click the Next button. 4. Observe the displayed page.	1. All mandatory selections and required fields should be completed successfully without validation errors. 2. The Next button should be visible and enabled. 3. The application should navigate to the "Additional Information" subsection under Collection of Data. 4. The "Additional Information" subsection should become active, and all information entered in the Personal Information subsection should be retained.	
TC083	Verify the Personal Information page displays the default sections and options when neither GDPR nor CCPA applies.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. In the Company Details section, "Do you have users in EU/EEA?" is set to "No". 3. In the Company Details section CCPA Thresholds question and Include CCPA Clauses question is set to "No".	1. Navigate to the Personal Information page. 2. Verify the page heading. 3. Locate the Personal Information section. 4. Observe the available sections and options displayed on the page.	1. The Personal Information page should load successfully. 2. The heading "What types of personal and sensitive personal information do you collect?" should be displayed. 3. The following sections and options should be displayed: Personal Information • Personal Data – Name, Address, Email Address • Professional & Educational Data – Professional or employment related information, Educational information that is not publicly available • Custom Data You Collect with a text field to enter data. Sensitive Personal Information • Identity & Demographics – Racial and ethnic origin, Religious or philosophical beliefs, Genetic information, Biometric information, Health information, Information regarding sex life, Sexual orientation • Custom Data You Collect with a text field to enter data. 4. GDPR-specific and CCPA-specific sections and options should not be displayed.	
TC084	Verify the Personal Information page displays the GDPR-specific sections and options when Users in EU/EEA is set to "Yes" and CCPA is not applicable.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. In the Company Details section, "Do you have users in EU/EEA?" is selected as "Yes". 3. In the Company Details section CCPA Thresholds question and Include CCPA Clauses question is set to "No".	1. Navigate to the Personal Information page under Collection of Data. 2. Verify the page heading. 3. Locate the Personal Information section and observe the available options. 4. Locate the Sensitive Personal Information section and observe the available options.	1. The Personal Information page should load successfully. 2. The heading "What types of personal and sensitive personal information do you collect?" should be displayed. 3. The default Personal Information options should be displayed along with the following GDPR-specific options: • Identification ID number • Location data CCPA-specific Personal Information options should not be displayed. 4. The default Sensitive Personal Information options should be displayed along with the GDPR-specific "Political Opinions" section containing the "Political opinion" option. CCPA-specific Sensitive Personal Information sections should not be displayed.	
TC085	Verify the Personal Information page displays the CCPA-specific sections and options when either CCPA Thresholds or Include CCPA Clauses is set to "Yes" and Users in EU/EEA is set to "No".	1. User should have Pro or ultimate subscription. 2. User is on Privacy Policy Generator > Collection of Data > Personal Information. 3. In the Company Details section, "Do you have users in EU/EEA?" is selected as "No". 4. In the Company Details section, either "Do you cross one or more of the following thresholds?" or "Do you want to include CCPA-compliant clauses even if not legally required?" is selected as "Yes".	1. Navigate to the Personal Information page under Collection of Data. 2. Verify the page heading. 3. Locate the Personal Information section and observe the available options. 4. Locate the Sensitive Personal Information section and observe the available options.	1. The Personal Information page should load successfully. 2. The heading "What types of personal and sensitive personal information do you collect?" should be displayed. 3. The default Personal Information options should be displayed along with the following CCPA-specific sections and options: • Personal Data – Birthday, Political and religious affiliations, Biometric information • Behavioral & Financial Data – Internet browsing history, Income and similar information, Commercial information GDPR-specific Personal Information options (Identification ID number and Location data) should not be displayed. 4. The default Sensitive Personal Information options should be displayed along with the following CCPA-specific sections: • Accounts & Authentication – State ID number, Drivers' licences, Passport numbers, Account login information, Social security number • Location & Tracking – Precise geolocation data, Citizenship or immigration status • Communications & Financial Data – Contents of emails or text messages, Debit or credit card numbers combined with any security or access code The GDPR-specific "Political Opinions" section should not be displayed.	

TC086	Verify the Personal Information page displays both GDPR-specific and CCPA-specific sections and options when Users in EU/EEA is set to "Yes" and either CCPA Thresholds or Include CCPA Clauses is set to "Yes".	1. User should have a Pro or ultimate subscription. 2. User is on Privacy Policy Generator > Collection of Data > Personal Information. 3. In the Company Details section, "Do you have users in EU/EEA?" is selected as "Yes". 4. In the Company Details section, either "Do you cross one or more of the following thresholds?" or "Do you want to include CCPA-compliant clauses even if not legally required?" is selected as "Yes".	1. Navigate to the Personal Information page under Collection of Data. 2. Verify the page heading. 3. Locate the Personal Information section and observe the available options. 4. Locate the Sensitive Personal Information section and observe the available options.	1. The Personal Information page should load successfully. 2. The heading "What types of personal and sensitive personal information do you collect?" should be displayed. 3. The default Personal Information options should be displayed along with both the GDPR-specific and CCPA-specific sections and options: • GDPR: Identification ID number, Location data • CCPA: Birthday, Political and religious affiliations, Biometric information, Behavioral & Financial Data 4. The default Sensitive Personal Information options should be displayed along with both the GDPR-specific and CCPA-specific sections and options: • GDPR: Political Opinions • CCPA: Accounts & Authentication, Location & Tracking, Communications & Financial Data.	
TC087	Verify the CCPA-specific sections display a Pro+ badge and remain locked for Free plan users.	1. User has a Free subscription. 2. User is on Privacy Policy Generator > Collection of Data > Personal Information.	1. Navigate to the Personal Information page. 2. Observe the CCPA-specific sections and options available on the page.	1. The CCPA-specific sections and options should display a Pro+ badge. 2. The CCPA-specific sections and options should remain disabled/locked and should not be selectable or editable by the user.	
TC088	Verify multiple options across all Personal Information and Sensitive Personal Information sections can be selected and deselected independently.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The applicable sections are displayed based on the selections made in the Company Details section.	1. Navigate to the Personal Information page. 2. Select multiple options from one or more available sections (e.g., Personal Data, Professional & Educational Data, Identity & Demographics, Accounts & Authentication). 3. Verify the selected options. 4. Deselect all the previously selected options. 5. Observe the selection state of all options.	1. The Personal Information page should load successfully. 2. Each selected option should become checked/highlighted, and multiple options should be selectable simultaneously. 3. All selected options should remain selected until changed by the user. 4. Each selected option should be deselected successfully when clicked again. 5. All previously selected options should be unchecked, and no unintended options should remain selected.	
TC089	Verify the informational tooltip for the "Sensitive Personal Information" section is displayed correctly	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The "Sensitive Personal Information" section is visible on the page.	1. Navigate to the Personal Information page. 2. Locate the tooltip() icon next to the "Sensitive Personal Information" heading. 3. Hover over the tooltip icon. 4. Observe the tooltip content and move the focus away.	1. The "Sensitive Personal Information" section should be displayed with a tooltip() icon. 2. The tooltip should be displayed when the tooltip icon is hovered over. 3. The tooltip should display the following information: "Sensitive personal information is information that people usually do not want to share with others unless it is very important to do so. This may include political affiliation, sexual orientation, health information, etc." 4. The tooltip should remain visible while the user is interacting with it and should close when focus is moved away.	
TC090	Verify the "Custom Data You Collect" field under Personal Information accepts valid custom data within the maximum character limit.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The "Custom Data You Collect" field under the Personal Information section is displayed.	1. Navigate to the "Custom Data You Collect" field under Personal Information. 2. Enter a valid custom data label containing up to 500 characters. 3. Click the Add (✓) button or press Enter. 4. Observe the input field.	1. The "Custom Data You Collect" field should be displayed. 2. The custom data label containing up to 500 characters should be accepted. 3. The custom data entry should be added successfully as a separate card below the section. 4. The input field should be cleared after the entry is added.	
TC091	Verify the "Custom Data You Collect" field under Personal Information prevents adding a custom data entry exceeding the maximum character limit	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The "Custom Data You Collect" field under the Personal Information section is displayed.	1. Navigate to the "Custom Data You Collect" field. 2. Enter a custom data label containing more than 500 characters. 3. Click the Add (✓) button or press Enter.	1. The "Custom Data You Collect" field should be displayed. 2. The application should prevent entering more than 500 characters or display an appropriate validation message when the maximum character limit is exceeded. 3. The Add (✓) button should remain disabled and the custom data entry exceeding 500 characters should not be added.	
TC092	Verify multiple custom personal data entries can be added successfully	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The "Custom Data You Collect" field under the Personal Information section is displayed.	1. Enter a valid custom data label and click the Add (✓) button. 2. Enter a second valid custom data label and click the Add (✓) button. 3. Repeat the process to add additional valid custom data entries. 4. Observe the added entries.	1. Each valid custom data label should be added. 2. Each added item should be displayed as a separate card. 3. Previously added entries should remain visible after adding new entries. 4. Multiple custom data entries should coexist without affecting one another.	
TC093	Verify a custom personal data entry can be removed successfully	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. At least one custom personal data entry has been added under the "Custom Data You Collect" section.	1. Locate an existing custom data entry. 2. Click the Remove (-) button displayed on the custom data entry. 3. Observe the updated list of custom data entries.	1. The selected custom data entry should be removed. 2. The removed entry should no longer be displayed in the list. 3. Any remaining custom data entries should continue to be displayed without modification.	

TC094	Verify leading and trailing spaces are trimmed when adding a custom data entry.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The "Custom Data You Collect" field under the Personal Information section is displayed.	1. Navigate to the "Custom Data You Collect" field. 2. Enter a valid custom data value with leading and trailing spaces . 3. Click the Add (✓) button or press Enter. 4. Observe the added custom data entry.	1. The "Custom Data You Collect" field should be displayed. 2. The entered value should be accepted. 3. The custom data entry should be added successfully. 4. The displayed custom data entry should be trimmed, with leading and trailing spaces removed .	
TC095	Verify duplicate custom data entries are not added.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. A custom data entry has already been added successfully.	1. Verify that the existing custom data entry is displayed. 2. Enter the same custom data value again. 3. Click the Add (✓) button or press Enter. 4. Observe the list of custom data entries.	1. The existing custom data entry should be displayed. 2. The duplicate value should be accepted for validation. 3. The application should prevent the duplicate entry from being added. 4. Only one instance of the custom data entry should remain in the list.	
TC096	Verify an empty custom data entry cannot be added	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The "Custom Data You Collect" field under the Personal Information section is displayed.	1. Navigate to the "Custom Data You Collect" field. 2. Leave the field empty without entering any value. 3. Click the Add (✓) button or press Enter. 4. Observe the section.	1. The "Custom Data You Collect" field should be displayed. 2. The field should remain empty. 3. Clicking the Add (✓) button or pressing Enter should not add a custom data entry. 4. No empty custom data entry should be created.	
TC097	Verify the "Custom Data You Collect" field under Sensitive Personal Information accepts valid custom data within the maximum character limit.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The "Custom Data You Collect" field under the Sensitive Personal Information section is displayed.	1. Navigate to the "Custom Data You Collect" field under Sensitive Personal Information. 2. Enter a valid custom data label containing up to 500 characters. 3. Click the Add (✓) button or press Enter. 4. Observe the input field.	1. The "Custom Data You Collect" field should be displayed. 2. The custom data label containing up to 500 characters should be accepted. 3. The custom data entry should be added successfully as a separate card below the section. 4. The input field should be cleared after the entry is added.	
TC098	Verify the "Custom Data You Collect" field under Sensitive Personal Information prevents adding a custom data entry exceeding the maximum character limit	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The "Custom Data You Collect" field under the Sensitive Personal Information section is displayed.	1. Navigate to the "Custom Data You Collect" field. 2. Enter a custom data label containing more than 500 characters. 3. Click the Add (✓) button or press Enter.	1. The "Custom Data You Collect" field should be displayed. 2. The application should prevent entering more than 500 characters or display an appropriate validation message when the maximum character limit is exceeded. 3. The Add (✓) button should remain disabled and the custom data entry exceeding 500 characters should not be added.	
TC099	Verify multiple custom sensitive personal data entries can be added successfully.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The "Custom Data You Collect" field under the Sensitive Personal Information section is displayed.	1. Enter a valid custom data label and click the Add (✓) button. 2. Enter a second valid custom data label and click the Add (✓) button. 3. Repeat the process to add additional valid custom data entries. 4. Observe the added entries.	1. Each valid custom data label should be added . 2. Each added item should be displayed as a separate card. 3. Previously added entries should remain visible after adding new entries. 4. Multiple custom data entries should coexist without affecting one another.	
TC100	Verify a custom sensitive personal data entry can be removed successfully.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. At least one custom sensitive personal data entry has been added under the "Custom Data You Collect" section.	1. Locate an existing custom data entry. 2. Click the Remove (-) button displayed on the custom data entry. 3. Observe the updated list of custom data entries.	1. The selected custom data entry should be removed . 2. The removed entry should no longer be displayed in the list. 3. Any remaining custom data entries should continue to be displayed without modification.	
TC101	Verify leading and trailing spaces are trimmed when adding a custom sensitive personal data entry.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The "Custom Data You Collect" field under the Sensitive Personal Information section is displayed.	1. Navigate to the "Custom Data You Collect" field. 2. Enter a valid custom data value with leading and trailing spaces. 3. Click the Add (✓) button or press Enter. 4. Observe the added custom data entry.	1. The "Custom Data You Collect" field should be displayed. 2. The entered value should be accepted. 3. The custom data entry should be added successfully. 4. The displayed custom data entry should be trimmed, with leading and trailing spaces removed.	
TC102	Verify duplicate custom sensitive personal data entries are not added.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. A custom sensitive personal data entry has already been added successfully.	1. Verify that the existing custom data entry is displayed. 2. Enter the same custom data value again. 3. Click the Add (✓) button or press Enter. 4. Observe the list of custom data entries.	1. The existing custom data entry should be displayed. 2. The duplicate value should be accepted for validation. 3. The application should prevent the duplicate entry from being added. 4. Only one instance of the custom data entry should remain in the list.	
TC103	Verify an empty custom sensitive personal data entry cannot be added.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The "Custom Data You Collect" field under the Sensitive Personal Information section is displayed.	1. Navigate to the "Custom Data You Collect" field. 2. Leave the field empty without entering any value. 3. Click the Add (✓) button or press Enter. 4. Observe the section.	1. The "Custom Data You Collect" field should be displayed. 2. The field should remain empty. 3. Clicking the Add (✓) button or pressing Enter should not add a custom data entry. 4. No empty custom data entry should be created.	

TC104	Verify the informational hint on the Personal Information page is displayed correctly.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information.	1. Navigate to the Personal Information page. 2. Locate the informational hint displayed at the right side of the page. 3. Read the content of the informational hint.	1. The Personal Information page should be displayed successfully. 2. The informational hint should be visible at the right side of the page. 3. The hint should display the following information: Why personal information matters Privacy laws like GDPR, CCPA, and LGPD require you to disclose the categories of personal and sensitive data you collect. This ensures transparency for your users and helps them exercise their rights. Be accurate and specific Only select the data types you actually collect. Listing unnecessary categories can create legal risk, while omitting categories may leave your policy incomplete or non-compliant.	
TC105	Verify page validation is displayed when mandatory fields are incomplete and the Next button is clicked.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. One or more mandatory fields or selections on the page are incomplete.	1. Leave one or more mandatory fields or selections incomplete. 2. Locate the Next button. 3. Click the Next button. 4. Observe the page validation message.	1. One or more mandatory fields or selections should remain incomplete. 2. The Next button should be visible and enabled. 3. The application should not navigate to the Additional Information section. 4. A page validation message should be displayed stating: "Please make sure that all fields are completely filled out before we continue with the process."	
TC106	Verify a success message is displayed when the Save Draft button is clicked.	1. User is on Privacy Policy Generator > Collection of Data > Personal Information. 2. The page contains valid entered or selected data.	1. Enter or select valid information on the page. 2. Locate the Save Draft button. 3. Click the Save Draft button. 4. Observe the confirmation message.	1. Valid information should be available on the page. 2. The Save Draft button should be visible and enabled. 3. The draft should be saved successfully. 4. A success message should be displayed stating: "Draft saved successfully!"	
ADDITIONAL INFORMATION					
TC107	Verify the "Additional Information" page loads successfully.	1. User has completed the Collection of Data > Personal Information section. 2. User has successfully navigated to Privacy Policy Generator > Collection of Data > Additional Information.	1. Navigate to the Additional Information section under Collection of Data. 2. Observe the page after it loads. 3. Verify the displayed sections and questions. 4. Observe the page navigation controls.	1. The Additional Information page should load successfully without any errors. 2. The "Additional Information" section should be displayed. 3. All applicable questions and input fields should be displayed based on the selections made in the Company Details section. 4. The Previous, Save Draft, and Next buttons should be visible and enabled.	
TC108	Verify clicking the "Previous" button on the Additional Information page navigates to the Personal Information section.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. The Additional Information page is currently displayed.	1. Verify that the Additional Information page is displayed. 2. Locate the Previous button at the bottom-left of the page. 3. Click the Previous button. 4. Observe the page content.	1. The Additional Information page should be displayed. 2. The Previous button should be visible and enabled. 3. The application should navigate to the Personal Information section under Collection of Data. 4. The Personal Information section should become the active section and all previously entered information should remain intact.	
TC109	Verify clicking the "Next" button on the Additional Information page navigates to the Use of Data page when all mandatory fields are completed.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. All mandatory questions and required fields on the Additional Information page are completed with valid inputs.	1. Verify that all mandatory questions and required fields are completed. 2. Locate the Next button at the bottom-right of the page. 3. Click the Next button. 4. Observe the page content.	1. All mandatory questions and required fields should be completed successfully. 2. The Next button should be visible and enabled. 3. The application should navigate to the Use of Data page. 4. The Use of Data page should become the active section and all entered information from the Additional Information page should be retained.	
TC110	Verify clicking the "Next" button without completing mandatory fields displays the mandatory field validation message.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. At least one mandatory question or required field is left unanswered or empty.	1. Leave one or more mandatory questions or required fields incomplete. 2. Locate the Next button. 3. Click the Next button. 4. Observe the validation message and page behavior.	1. One or more mandatory questions or required fields should remain incomplete. 2. The Next button should be clickable. 3. The application should display the validation message: "Please make sure that all fields are completely filled out before we continue with the process." 4. The user should remain on the Additional Information page until all mandatory information is completed.	
TC111	Verify clicking the "Save Draft" button successfully saves the entered information.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. At least one valid selection or input has been provided on the page.	1. Enter or select valid information on the Additional Information page. 2. Locate the Save Draft button. 3. Click the Save Draft button. 4. Observe the confirmation message.	1. Valid information should be available on the page. 2. The Save Draft button should be visible and enabled. 3. The entered information should be saved successfully. 4. The success message "Draft saved successfully!" should be displayed.	

TC112	Verify the Additional Information page displays the default sections and options when neither GDPR, CCPA, nor CalOPPA applies.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. In the Company Details section, "Do you have users in EU/EEA?" is set to "No". 3. In the Company Details section, CCPA Thresholds and Include CCPA Clauses are set to "No". 4. In the Company Details section, "Do you sell or share personal information?" is set to "No".	1. Navigate to the Additional Information page. 2. Verify the page heading. 3. Observe the available questions. 4. Observe the page.	1. The Additional Information page should load successfully. 2. The "Additional Information" heading should be displayed. 3. The following default questions should be displayed: • Do you use cookies or other tracking technologies? with Yes and No options. • How do you respond to 'Do Not Track' requests? with a multi-line text input field for entering the response. 4. GDPR, CCPA and CalOPPA specific questions should not be displayed.	
TC113	Verify the Additional Information page displays the GDPR-specific questions when Users in EU/EEA is set to "Yes" and CCPA is not applicable.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. In the Company Details section, "Do you have users in EU/EEA?" is set to "Yes". 3. In the Company Details section, "Do you cross one or more of the following CCPA thresholds?" is set to "No". 4. In the Company Details section, "Do you want to include CCPA-compliant clauses even if not legally required?" is set to "No". 5. In the Company Details section, "Do you sell or share personal information?" is set to "No".	1. Navigate to the Additional Information page. 2. Verify the page heading. 3. Observe the default questions displayed on the page. 4. Locate the question "Do you collect information about users below the age of 16?" and observe the available options. 5. Locate the question "What are the legal bases for collecting the data?" and observe the available options. 6. Observe whether any CCPA-specific or CalOPPA-specific questions are displayed.	1. The Additional Information page should load successfully. 2. The "Additional Information" heading should be displayed. 3. The default questions should be displayed. 4. The question "Do you collect information about users below the age of 16?" should be displayed with both Yes and No options. 5. The question "What are the legal bases for collecting the data?" should be displayed with the following selectable options: • Consent • Performing contractual obligations • Legal obligations • Public task • Legitimate interest of the controller • Vital interest 6. CCPA and CalOPPA specific questions should not be displayed.	
TC114	Verify the Additional Information page displays the CCPA-specific question when either CCPA Thresholds or Include CCPA Clauses is set to "Yes" and Users in EU/EEA is set to "No".	1. User has a Pro or ultimate subscription. 2. User is on Privacy Policy Generator > Collection of Data > Additional Information. 3. In the Company Details section, "Do you have users in EU/EEA?" is set to "No". 4. In the Company Details section, either "Do you cross one or more of the following thresholds?" or "Do you want to include CCPA-compliant clauses even if not legally required?" is set to "Yes". 5. In the Company Details section, "Do you sell or share personal information?" is set to "No".	1. Navigate to the Additional Information page. 2. Verify the page heading. 3. Observe the default questions displayed on the page. 4. Locate the question "Do you collect information about users below the age of 13?". 5. Observe the remaining GDPR and CalOPPA questions.	1. The Additional Information page should load successfully. 2. The "Additional Information" heading should be displayed. 3. The default questions should be displayed: • Do you use cookies or other tracking technologies? with Yes and No options. • How do you respond to 'Do Not Track' requests? with a multi-line text input field. 4. The question "Do you collect information about users below the age of 13?" should be displayed with Yes and No options. 5. The GDPR-specific questions and the CalOPPA-specific question should not be displayed.	
TC115	Verify the Additional Information page displays both GDPR-specific and CCPA-specific questions when Users in EU/EEA is set to "Yes" and either CCPA Thresholds or Include CCPA Clauses is set to "Yes".	1. User has a Pro or ultimate subscription. 2. User is on Privacy Policy Generator > Collection of Data > Additional Information. 3. In the Company Details section, "Do you have users in EU/EEA?" is set to "Yes". 4. In the Company Details section, either "Do you cross one or more of the following thresholds?" or "Do you want to include CCPA-compliant clauses even if not legally required?" is set to "Yes". 5. In the Company Details section, "Do you sell or share personal information?" is set to "No".	1. Navigate to the Additional Information page. 2. Verify the page heading. 3. Observe the default questions displayed on the page. 4. Locate the GDPR-specific questions. 5. Locate the CCPA-specific question. 6. Observe the CalOPPA-specific question.	1. The Additional Information page should load successfully. 2. The "Additional Information" heading should be displayed. 3. The following default questions should be displayed: • Do you use cookies or other tracking technologies? with Yes and No options. • How do you respond to 'Do Not Track' requests? with a multi-line text input field. 4. The following GDPR-specific questions should be displayed: • Do you collect information about users below the age of 16? with Yes and No options. • What are the legal bases for collecting the data? with the following selectable options: • Consent • Performing contractual obligations • Legal obligations • Public task • Legitimate interest of the controller • Vital interest 5. The question "Do you collect information about users below the age of 13?" should be displayed with Yes and No options. 6. The question "Do you have a process that allows users to review and request changes to their information?" should not be displayed.	

TC116	Verify the Additional Information page displays the CalOPPA-specific question when "Do you sell or share personal information?" is set to "Yes".	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. In the Company Details section, "Do you sell or share personal information?" is set to "Yes".	1. Navigate to the Additional Information page. 2. Verify the page heading. 3. Observe the default questions displayed on the page. 4. Observe the CalOPPA-specific question. 5. Verify the GDPR and CCPA questions.	1. The Additional Information page should load successfully. 2. The "Additional Information" heading should be displayed. 3. The default questions should be displayed. 4. The question "Do you have a process that allows users to review and request changes to their information?" along with the 'yes' and 'no' options. 5. The GDPR-specific and CCPA-specific questions should be displayed only if their corresponding conditions in the Company Details section are satisfied.	
TC117	Verify selecting "Yes" for the "Do you have a process that allows users to review and request changes to their information?" question displays the description field	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. In the Company Details section, "Do you sell or share personal information?" is set to "Yes".	1. Locate the question "Do you have a process that allows users to review and request changes to their information?". 2. Click the Yes option. 3. Observe the section displayed below the question.	1. The question should be displayed with Yes and No options. 2. The Yes option should become selected. 3. A multi-line text input field with the question "Describe how users can review or update their data." should be displayed and enabled for input.	
TC118	Verify selecting "No" for the "Do you have a process that allows users to review and request changes to their information?" question does not display the description field	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. In the Company Details section, "Do you sell or share personal information?" is set to "Yes".	1. Locate the question "Do you have a process that allows users to review and request changes to their information?". 2. Click the No option. 3. Observe the section displayed below the question.	1. The question should be displayed with Yes and No options. 2. The No option should become selected. 3. The "Describe how users can review or update their data." text input field should not be displayed.	
TC119	Verify the "Describe how users can review or update their data" field accepts valid input within the maximum character limit.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. "Do you have a process that allows users to review and request changes to their information?" is selected as "Yes". 3. The "Describe how users can review or update their data." text field is displayed.	1. Locate the "Describe how users can review or update their data." text field. 2. Enter a valid description containing up to 2500 characters. 3. Click outside the field.	1. The text field should be displayed and enabled. 2. The entered description containing up to 2500 characters should be accepted without displaying a validation message. 3. The entered value should remain displayed in the field.	
TC120	Verify the "Describe how users can review or update their data" field enforces the maximum character limit.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. "Do you have a process that allows users to review and request changes to their information?" is selected as "Yes". 3. The "Describe how users can review or update their data." text field is displayed.	1. Locate the text field. 2. Enter more than 2500 characters. 3. Click outside the field.	1. The text field should be displayed and enabled. 2. The application should prevent entering more than 2500 characters and display an appropriate validation message "Please limit your response to 2500 characters." 3. The content exceeding 2500 characters should not be accepted.	
TC121	Verify the "Describe how users can review or update their data" field is mandatory when "Do you have a process that allows users to review and request changes to their information?" is selected as "Yes".	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. "Do you have a process that allows users to review and request changes to their information?" is selected as "Yes". 3. The "Describe how users can review or update their data." text field is displayed.	1. Leave the "Describe how users can review or update their data." field empty. 2. Click the Next button. 3. Observe the page.	1. The field should remain empty. 2. The user should remain on the Additional Information page. 3. The page validation message "Please make sure that all fields are completely filled out before we continue with the process." should be displayed.	
TC122	Verify selecting "Yes" for the "Do you use cookies or other tracking technologies?" question displays the Cookie Policy URL field and Cookie Policy Generator link.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. The "Do you use cookies or other tracking technologies?" question is displayed.	1. Locate the "Do you use cookies or other tracking technologies?" question. 2. Click the Yes option. 3. Observe the section displayed below the question. 4. Observe the additional link displayed below the URL field.	1. The question should display Yes and No options. 2. The Yes option should become selected. 3. A text input field labeled "Add link to your cookie policy" should be displayed and enabled for entering a valid Cookie Policy URL. 4. The text "Need a cookie policy for your website? Click here to create one in minutes!" should be displayed below the URL field.	
TC123	Verify the "Add link to your cookie policy" field accepts a valid Cookie Policy URL.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. The "Do you use cookies or other tracking technologies?" question is set to Yes. 3. The "Add link to your cookie policy" field is displayed.	1. Locate the "Add link to your cookie policy" field. 2. Enter a valid Cookie Policy URL (e.g., [link removed]). 3. Click outside the field.	1. The "Add link to your cookie policy" field should be displayed and enabled. 2. The valid Cookie Policy URL should be accepted without displaying a validation message. 3. The entered URL should remain displayed in the field.	

TC124	Verify clicking the "Click here" link redirects the user to the Cookie Policy Generator.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. The "Do you use cookies or other tracking technologies?" question is set to Yes. 3. The Cookie Policy Generator link is displayed.	1. Locate the text "Need a cookie policy for your website? Click here to create one in minutes!". 2. Click the "Click here" link. 3. Observe the page that opens.	1. The Cookie Policy Generator link should be displayed. 2. Clicking "Click here" should redirect the user to the Cookie Policy Generator page. 3. The Cookie Policy Generator page should load successfully.	
TC125	Verify selecting "No" for the "Do you use cookies or other tracking technologies?" question does not display the Cookie Policy URL field.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. The "Do you use cookies or other tracking technologies?" question is displayed.	1. Locate the "Do you use cookies or other tracking technologies?" question. 2. Click the No option. 3. Observe the section displayed below the question.	1. The question should display Yes and No options. 2. The No option should become selected. 3. The "Add link to your cookie policy" URL field and the "Need a cookie policy for your website? Click here to create one in minutes!" link should not be displayed.	
TC126	Verify the tooltip for the "Do you use cookies or other tracking technologies?" question is displayed correctly.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. The "Do you use cookies or other tracking technologies?" question is displayed.	1. Locate the tooltip icon (ⓘ) next to the "Do you use cookies or other tracking technologies?" question. 2. Hover over the tooltip icon. 3. Observe the tooltip content. 4. Click outside the tooltip or move the pointer away.	1. The tooltip icon should be displayed next to the question. 2. The tooltip should be displayed on hover . 3. The tooltip should display the following text: "Other tracking technologies include pixels, tags, and similar tools that track user activity or device data across sites or apps." 4. The tooltip should disappear.	
TC127	Verify the tooltip for the "How do you respond to 'Do Not Track' requests?" question is displayed correctly.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. The "How do you respond to 'Do Not Track' requests?" question is displayed.	1. Locate the tooltip icon (ⓘ) next to the "How do you respond to 'Do Not Track' requests?" question. 2. Hover over the tooltip icon. 3. Observe the tooltip content. 4. Click outside the tooltip or move the pointer away.	1. The tooltip icon should be displayed next to the question. 2. The tooltip should be displayed on hover. 3. The tooltip should display the following text: "Most privacy laws require the website owner to inform users/consumers how the website responds to 'Do Not Track' requests or similar mechanisms." 4. The tooltip should disappear.	
TC128	Verify the tooltip for the "What are the legal bases for collecting the data?" question is displayed correctly.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. The "What are the legal bases for collecting the data?" section is displayed.	1. Locate the tooltip icon (ⓘ) next to the "What are the legal bases for collecting the data?" question. 2. Hover over the tooltip icon. 3. Observe the tooltip content. 4. Click outside the tooltip or move the pointer away.	1. The tooltip icon should be displayed next to the question. 2. The tooltip should be displayed on hover. 3. The tooltip should display the following text: "The legal bases are the legal reasons for which you are collecting and processing the data." 4. The tooltip should disappear.	
TC129	Verify the tooltip for the "Do you collect information about users below the age of 13?" question is displayed correctly.	1. User has a Pro or ultimate subscription. 2. User is on Privacy Policy Generator > Collection of Data > Additional Information. 3. The "Do you collect information about users below the age of 13?" question is displayed.	1. Locate the tooltip icon (ⓘ) next to the "Do you collect information about users below the age of 13?" question. 2. Hover over the tooltip icon. 3. Observe the tooltip content. 4. Click outside the tooltip or move the pointer away.	1. The tooltip icon should be displayed next to the question. 2. The tooltip should be displayed on hover. 3. The tooltip should display the following text: "Under COPPA (US) and similar laws, collecting personal data from children under 13 requires verifiable parental consent. Indicate whether your service collects data from this age group." 4. The tooltip should disappear.	
TC130	Verify the tooltip for the "Do you have a process that allows users to review and request changes to their information?" question is displayed correctly.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. In the Company Details section, "Do you sell or share personal information?" is set to "Yes". 3. TC143	Verify selecting "Legitimate interest of the controller" displays the description field	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. In the Company Details section, "Do you have users in EU/EEA?" is set to "Yes".	1. Locate the Legitimate interest of the controller option. 2. Select the option. 3. Observe the section.	1. The option should be displayed. 2. The option should become selected. 3. The input field labeled "What are these legitimate interests?" and the add(✓) button should be displayed.	
TC144	Verify a valid Legitimate Interest description can be entered and saved successfully	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. In the Company Details section, "Do you have users in EU/EEA?" is set to "Yes". 3. Legitimate interest of the controller is selected.	1. Locate the "What are these legitimate interests?" input field. 2. Enter a valid Legitimate Interest description containing up to 2000 characters. 3. Click the add(✓) button. 4. Observe the field after saving.	1. The input field should be displayed with the add(✓) button disabled. 2. The entered description should be accepted successfully, and the add(✓) button should become enabled. 3. The description should be saved successfully. 4. The entered description should remain displayed in the input field, and the add(✓) button should change to a red (-) Remove button.	
TC145	Verify the Legitimate Interest description is mandatory when the option is selected	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. In the Company Details section, "Do you have users in EU/EEA?" is set to "Yes". 3. Legitimate interest of the controller is selected.	1. Verify that the Legitimate interest of the controller option is selected. 2. Leave the description field empty. 3. Click the Next button. 4. Observe the page.	1. The "What are these legitimate interests?" field should be displayed. 2. The description field should remain empty. 3. The application should not proceed to the next page. 4. The validation message "Please make sure that all fields are completely filled out before we continue with the process." should be displayed.	
TC146	Verify the Legitimate Interest description enforces the maximum character limit	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. In the Company Details section, "Do you have users in EU/EEA?" is set to "Yes". 3. Legitimate interest of the controller is selected.	1. Locate the "What are these legitimate interests?" field. 2. Enter a description containing more than 2000 characters. 3. Click the add (✓) button.	1. The input field should be displayed. 2. The application should prevent entering more than 2000 characters and display an appropriate validation message "Please limit your response to 2000 characters." 3. The description exceeding the maximum character limit should not be saved.	
TC147	Verify removing the saved Legitimate Interest description	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. In the Company Details section, "Do you have users in EU/EEA?" is set to "Yes". 3. A valid Legitimate Interest description has already been saved.	1. Locate the saved Legitimate Interest description. 2. Click the red (-) Remove button. 3. Observe the field.	1. The saved description should be displayed in the input field. 2. The saved description should be removed successfully. 3. The description field should become empty and the add(✓) button should be displayed again.	
TC148	Verify deselecting Legitimate interest of the controller hides the description field	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. In the Company Details section, "Do you have users in EU/EEA?" is set to "Yes". 3. Legitimate interest of the controller is selected.	1. Verify that the "What are these legitimate interests?" field is displayed. 2. Deselect the Legitimate interest of the controller option. 3. Observe the section.	1. The description field should be visible. 2. The option should become unchecked. 3. The "What are these legitimate interests?" field should no longer be displayed.	

TC149	Verify the user cannot proceed to the Use of Data page when mandatory fields in the Personal Information section are incomplete	1. User is on Privacy Policy Generator > Collection of Data > Additional Information. 2. One or more mandatory fields in the Personal Information section were left incomplete before navigating to the Additional Information page.	1. Verify that the Additional Information page is displayed. 2. Complete all mandatory fields in the Additional Information page. 3. Click the Next button. 4. Observe the page.	1. The Additional Information page should be displayed successfully. 2. All mandatory fields in the Additional Information page should be completed successfully. 3. The application should validate the information entered in both the Personal Information and Additional Information sections. 4. The application should not navigate to the Use of Data page and should display the validation message: "Please make sure that all fields are completely filled out before we continue with the process."	
TC150	Verify clicking the "Personal Information" section under the Collection of Data title navigates to the Personal Information page.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information.	1. Verify that the Collection of Data section is displayed with Personal Information marked as completed. 2. Click the Personal Information section. 3. Observe the displayed page. 4. Verify the current section.	1. Personal Information should be displayed as completed and Additional Information should be displayed as the current section. 2. The application should navigate to the Personal Information page. 3. The Personal Information page should be displayed with all previously entered data retained. 4. Personal Information should be displayed as the current section, and Additional Information should no longer be the current section.	
TC151	Verify the "Collection of Data" section in the left navigation is marked as completed only after all mandatory fields in both the Personal Information and Additional Information sections are completed.	1. User is on Privacy Policy Generator > Collection of Data > Additional Information.	1. Complete all mandatory fields in the Personal Information section. 2. Complete all mandatory fields in the Additional Information section. 3. Click the Next button. 4. Observe the left navigation panel.	1. All mandatory fields in the Personal Information section should be completed. 2. All mandatory fields in the Additional Information section should be completed. 3. The application should navigate to the Use of Data page. 4. The Collection of Data section in the left navigation should be marked as completed with a checkmark icon.	
TC152	Verify clicking "Back to Dashboard" displays the Save Progress confirmation dialog.	1. User is on any page of the Privacy Policy Generator. 2. The user has entered or modified data that has not been saved.	1. Click the Back to Dashboard button. 2. Observe the dialog. 3. Verify the dialog content. 4. Verify the available actions.	1. The Save Progress confirmation dialog should be displayed. 2. The dialog should display the title "Save progress?". 3. The message "Save a draft to continue where you left off when you return." should be displayed. 4. The dialog should display the Discard, Save draft, and Close (X) options.	
TC153	Verify clicking "Discard" closes the Save Progress dialog and navigates to the Dashboard	1. User is on any page of the Privacy Policy Generator. 2. The Save Progress confirmation dialog is displayed.	1. Click the Discard button. 2. Verify the displayed page.	1. The confirmation dialog should close. 2. The user should be navigated to the Dashboard, and unsaved changes should be discarded.	
TC154	Verify clicking "Save draft" saves the draft and navigates to the Dashboard	1. User is on any page of the Privacy Policy Generator. 2. The Save Progress confirmation dialog is displayed.	1. Click the Save draft button. 2. Verify the displayed message. 3. Verify the displayed page.	1. The application should save the current draft successfully. 2. A "Draft saved successfully" message should be displayed. 3. The user should be navigated to the Dashboard after the draft is saved successfully.	
TC155	Verify clicking the Close (X) icon dismisses the Save Progress dialog	1. User is on any page of the Privacy Policy Generator. 2. The Save Progress confirmation dialog is displayed.	1. Click the Close (X) icon. 2. Verify the current page. 3. Verify the entered information.	1. The Save Progress confirmation dialog should close. 2. The user should remain on the current Privacy Policy Generator page. 3. All previously entered information should remain unchanged.
